Apple Confidential For Internal Use Only

U.S. District Court - NDCAL
4:20-cv-05640-YGR-TSH
Epic Games, Inc. v Apple Inc.
Ex. No. **CX-0227**
Date Entered _____
By _____

Summary

Resulting from the Epic injunction, Apple is

“permanently restrained and enjoined from prohibiting developers from (i) including in their apps and their metadata buttons, external links, or other calls to action that direct customers to purchasing mechanisms, in addition to In-App Purchasing and (ii) communicating with customers through points of contact obtained voluntarily from customers through account registration within the app.”

Compliance Requirement

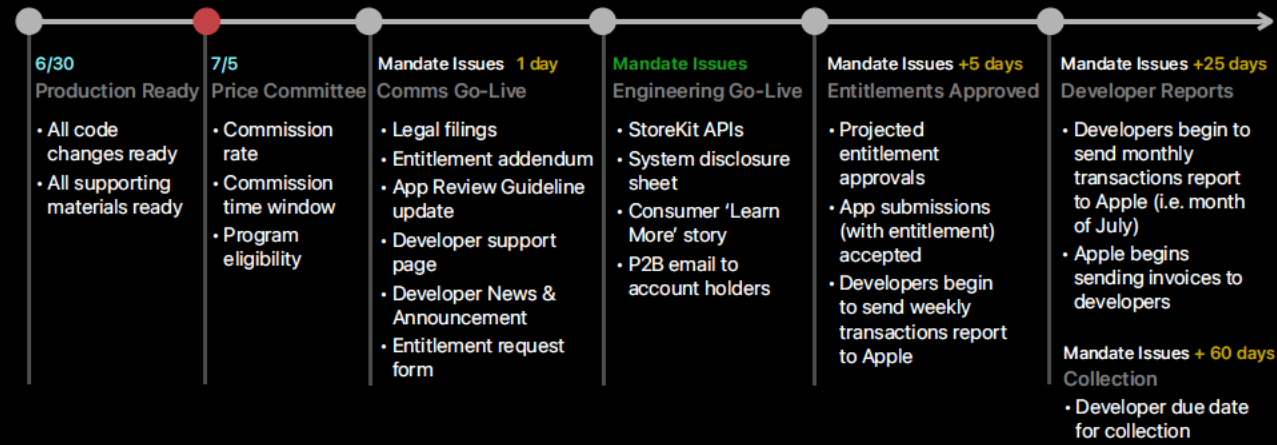

Item	Linked Transactions
Geo	US
Eligibility	iOS or iPadOS App Store, US storefront
Compliance Date	As soon as Friday, July 7, 2023

Key Pricing Considerations

Commission Rate

Link Entitlement Policies & User Experience

- Language and design must follow templates
- One URL per app
- Link can only be displayed once in an app, on an app page user navigates to (not an interstitial, modal, or pop-up), and can't persist when user leaves page
- Link can not be displayed on any page that is part of an in-app flow to merchandise/initiate an IAP

Analysis Group Valuation of Developer Offering Components

All percentages are expressed relative to customer spend

Apple Framework	Analysis Group Framework	Costs for Small Developers	Costs to Large Developers	Notes
Platform Integrity	Platform Technology	30% for integrated game platforms (inclusive of other items)		Provides a lower bound on the value because substitutes do not replicate all capabilities of the Apple platform
Proprietary Tools and Technology		5% - 20% for platform technology with demand generation 0.3% - 6% for platform technology with no demand generation		
Developer Services and Support	Developer Tools and Services	5% - 16%		A key benefit of current Apple model is that it lowers start-up costs and risks
Secure Distribution at Scale	Distribution	4% - 25%	4% - 14%	Provides a lower bound that does not include the user rush in the App Store's privacy and piracy protection measures
Discovery	Discovery	5% - 21%	5% - 14%	Third-party discovery options involve substantial effort and may require paying for services without realizing revenue
IAP Payments and Commerce	No valuation exercise undertaken	Not estimated		

Possible overlap in Analysis Group framework, so separate line items are not necessarily additive. Per Analysis Group, Apple's offering is unique and that these values are approximations of the value of these services. Apple Confidential For Internal Use Only

Key Assumptions for Financial Impact Analysis

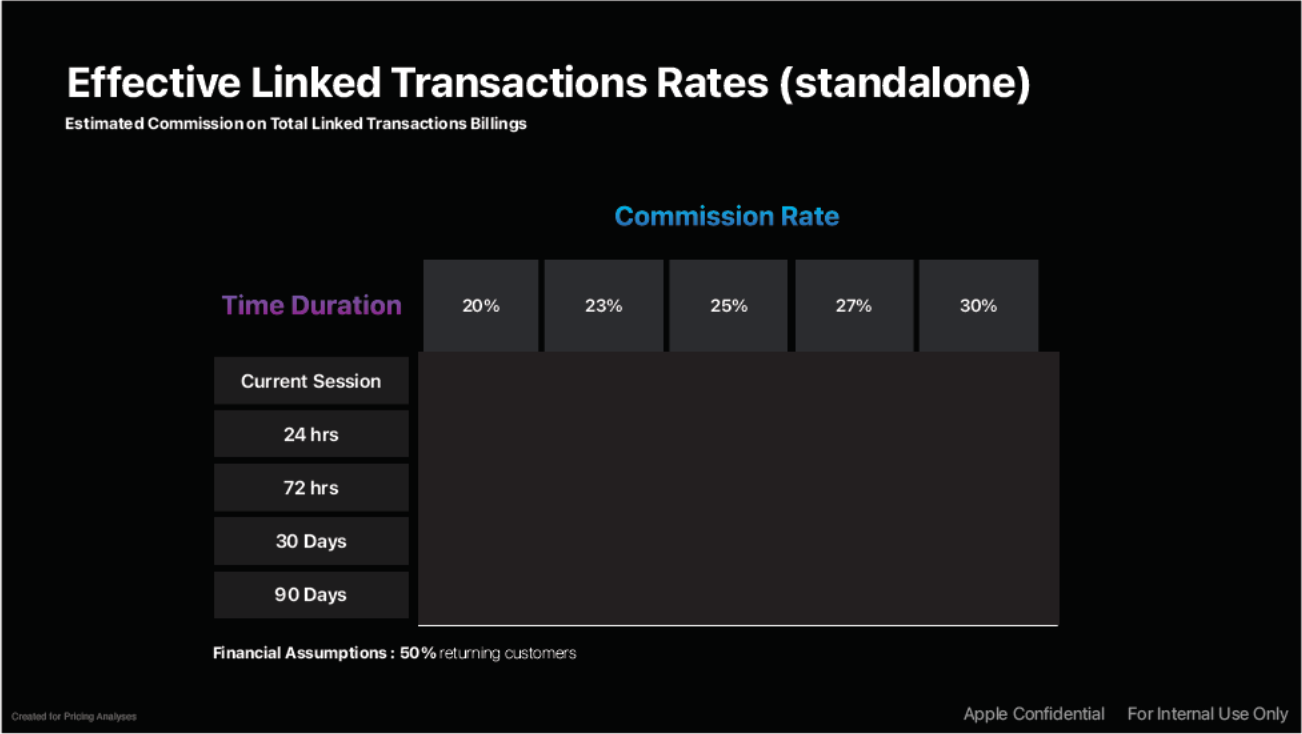

- Efficient implementation by developers to maximize their margin
- All subsequent non-sub transactions go through developers' direct channels (with no commission)
- Every subsequent transaction that goes through the App Store will reduce Apple's revenue loss
- VPP and NPP Linked Transactions billings are not eligible for program discounts
- 10% collection/measurement risk factored into sensitivities
- 25% breakage is the break-even point for developer decisioning
